

CONSTRUCTION SITE SECURITY OVERVIEW

BUILDING SITE SECURITY SOLUTIONS

Building sites are a very attractive target for would be thieves and a quick look at the figures show the reasons why. The theft and vandalism at building sites in Canada has cost the industry an estimated \$400 million a year which is over \$1 million a day.

But even armed with such knowledge building site security is not always classed as a high priority. With most building site management teams working against strict budgets and targets, the security of the building site is viewed as a costly and inefficient use of resources.

It is for this reason that potential thieves find a building site an attractive and profitable target – primarily due to the treasure chest of highly valuable equipment which can be sold on the black market very quickly. It is not just the building site plant equipment that is at risk, the site office is also at risk. The office is usually located in an inaccessible area which is hard to secure and out of site, but it also contains some very expensive equipment, as well as high value information which could be very useful to rival companies.

PROFESSIONAL BUILDING SITE SECURITY SOLUTIONS FROM PRODUCTIVE SECURITY INC

Productive's building site security solutions offer a wealth of high end security services to secure your building site, plant equipment and office. Our range can be used to secure anything from whole sites, scaffoldings and vacant areas down to individual items by our specialized building security services teams.

As well as offering a range of visual, physical and electronic building site security solutions, Productive also offers professional advice and assistance to ensure your building site security is as watertight as possible.

BUILDING SITE SECURITY ADVICE

Potential security measures which could assist in the security of your building site are permanent marking of all equipment, good control of staff (most thefts are committed by employees or people in the industry), ensure all keys - particularly ignition keys - are returned to the site office, provide security passes to all staff and report all suspicious behavior to site management and security. These measures when combined with a building site security solution from Productive Security will ensure your building site security is at a very high level.

We offer a complete building site security solution to protect your building site, construction site or vacant site using our high end security solutions.

MAKING THE DECISION TO IMPLEMENT A SECURITY PROGRAM

Once a decision is made that your construction site has immediate or long-term security needs, Productive Security can help your management team develop an effective and detailed security program, not only through the implementation of uniformed Officers, but also making sure that all stakeholders are familiar with it and implement it.

As part of developing a security program, Productive Security offers your company:

- We will conduct a detailed and extensive inspection and survey of your site to create a tailored and specific set of strict patrol compliance standards for the premises. These standards, also known as Standing Orders, act as the site's security blueprint and guide the site's Officers in most everything they do there. Most importantly, these Standing Orders are created as part of the written contract between your company and ours, guaranteeing a higher potential of success in identifying and eradicating your site's security challenges.
- We will implement a detailed and systematic Reporting Structure based on Management's priority to enforce and eradicate security challenges on the site. Productive Security's daily reporting structure is strictly based on client instructions, and thoroughly details occurrences and incidents. We also provide management with bi-weekly review and assessment of our Officers and the site's performance, combined with a File of Incidents and Occurrences.
- We will provide support and supervision to your site and our on-site Officers by way of Mobile Emergency Response Units and regular visits by Mobile Supervisors available 24 hours a day.
- We will provide Courteous, Authoritative, Consistent and Reliable Security Service. Our mandate is to provide an overall sense of Security for your sites through Well Trained, Professional, Diligent and Culturally Diverse, Uniformed Officers.
- We will provide a fair and Competitive Hourly Rate to fit your budget. Please contact us for more information at info@prodsec.ca, or 416-535-9341.
